

# Manual on MetaClassroom

Dear Students,

Welcome Again! As we will meet in the VR MetaClassrom during our lectures, this manual includes the basic instruction to get you ready for the experience.

## Basic Controls of the VR Headset

During the class, you will be using an Oculus Quest Pro device to enter the metaverse classroom. The controls in the classroom application using touch controllers:

Move your controllers to move your avatar's hand.

Use the left thumbstick for moving forward/backward/side-to-side. Use the right thumbstick for turning left/right.

Single press the Oculus button to toggle tray menu, where you can quit the application.

Long-press to reset your position.

Use ray indicator from your right hand to point at interactable objects (e.g., virtual buttons) and press right trigger button to interact with them.

Press X button on your left controller to switch voice mode between Proximity Mode and Global Mode.
